Project Name: MCT Live Loan Lock
Role : Senior Developer
Tools & Technologies : Python, MySQL, jQuery, JSON, AJAX, Bootstrap
Framework : Django

Project Description:

MCT Live Loan Lock is designed to read emails from mailboxes. The client used read emails manually and work on the loan tickets. Each team has a separate mailbox. In this project, we are reading emails from outlook mailbox using IMAP and each mail is considered as a ticket. It will then be assigned to a specific Analyst based on information provided in the ticket. Once a ticket is completed, the respective email will be moved to separate folder in the respective mailbox.

Project Name: Examination Online
Role : Senior Developer
Tools & Technologies : PHP, MySQL, jQuery, JSON, AJAX, Bootstrap
Framework : Codeigniter

Project Description:

Examination Online is designed to identify training and learning gaps with the use of analytical data reports. It focuses Online Training and Assessment with a wide range of features which includes Course Creation, Course Content Management, Student Management, and Online Tests.

We have different user roles such as the Manager, Staff and Student. This software helps to invite students, tutor them online, organize online tests and generate reports.

Project Name: Lawbench
Role : Senior Developer
Tools & Technologies : PHP, MySQL, jQuery, JSON, AJAX, Bootstrap
Framework : Codeigniter

Project Description:

Lawbench.com is a cost-effective way for individuals to get fact-specific opinions on immigration law from multiple lawyers!

Lawbench.com gives users access to a panel of lawyers that specialize in U.S. immigration law. Users can ask questions to particular lawyers on the panel, and the lawyers answer the questions asked of them. The

information is then posted and archived so that others with similar questions can share the legal information. Users can also request a quick phone consultation with a lawyer directly from Lawbench.
